

REMARKS

Drawing

Submitted herewith is a new drawing, as required by the Examiner.

Claim Amendment

The claims are amended to overcome the objections of the Examiner.

Examiner's Reason for Allowance

Attorney for applicant objects to the Examiner's stated reasons for allowance to the extent that they differ from what is recited in the claims. For example, the claims do not recite, and are not limited to:

- an antireflection layer ... "on" the front panel;
- a front electrode member "on" the antireflection layer;
- an organic electroluminescent member "on" the front electrode member; or
- a counterelectrode member "on" the electroluminescent member (emphasis added).

Further, the original claim language "consisting of an organic polymer" has been amended to the more typical and accepted language --consisting essentially of-- for composition claims, which better protects the scope of the invention to which applicant is entitled.

Concluding Remarks

In view of the foregoing amendments and comments, it is submitted that the application is in condition for allowance, which action is respectfully requested.

Respectfully submitted,

By /R.J.Kraus/
